(57) **CLAIM**

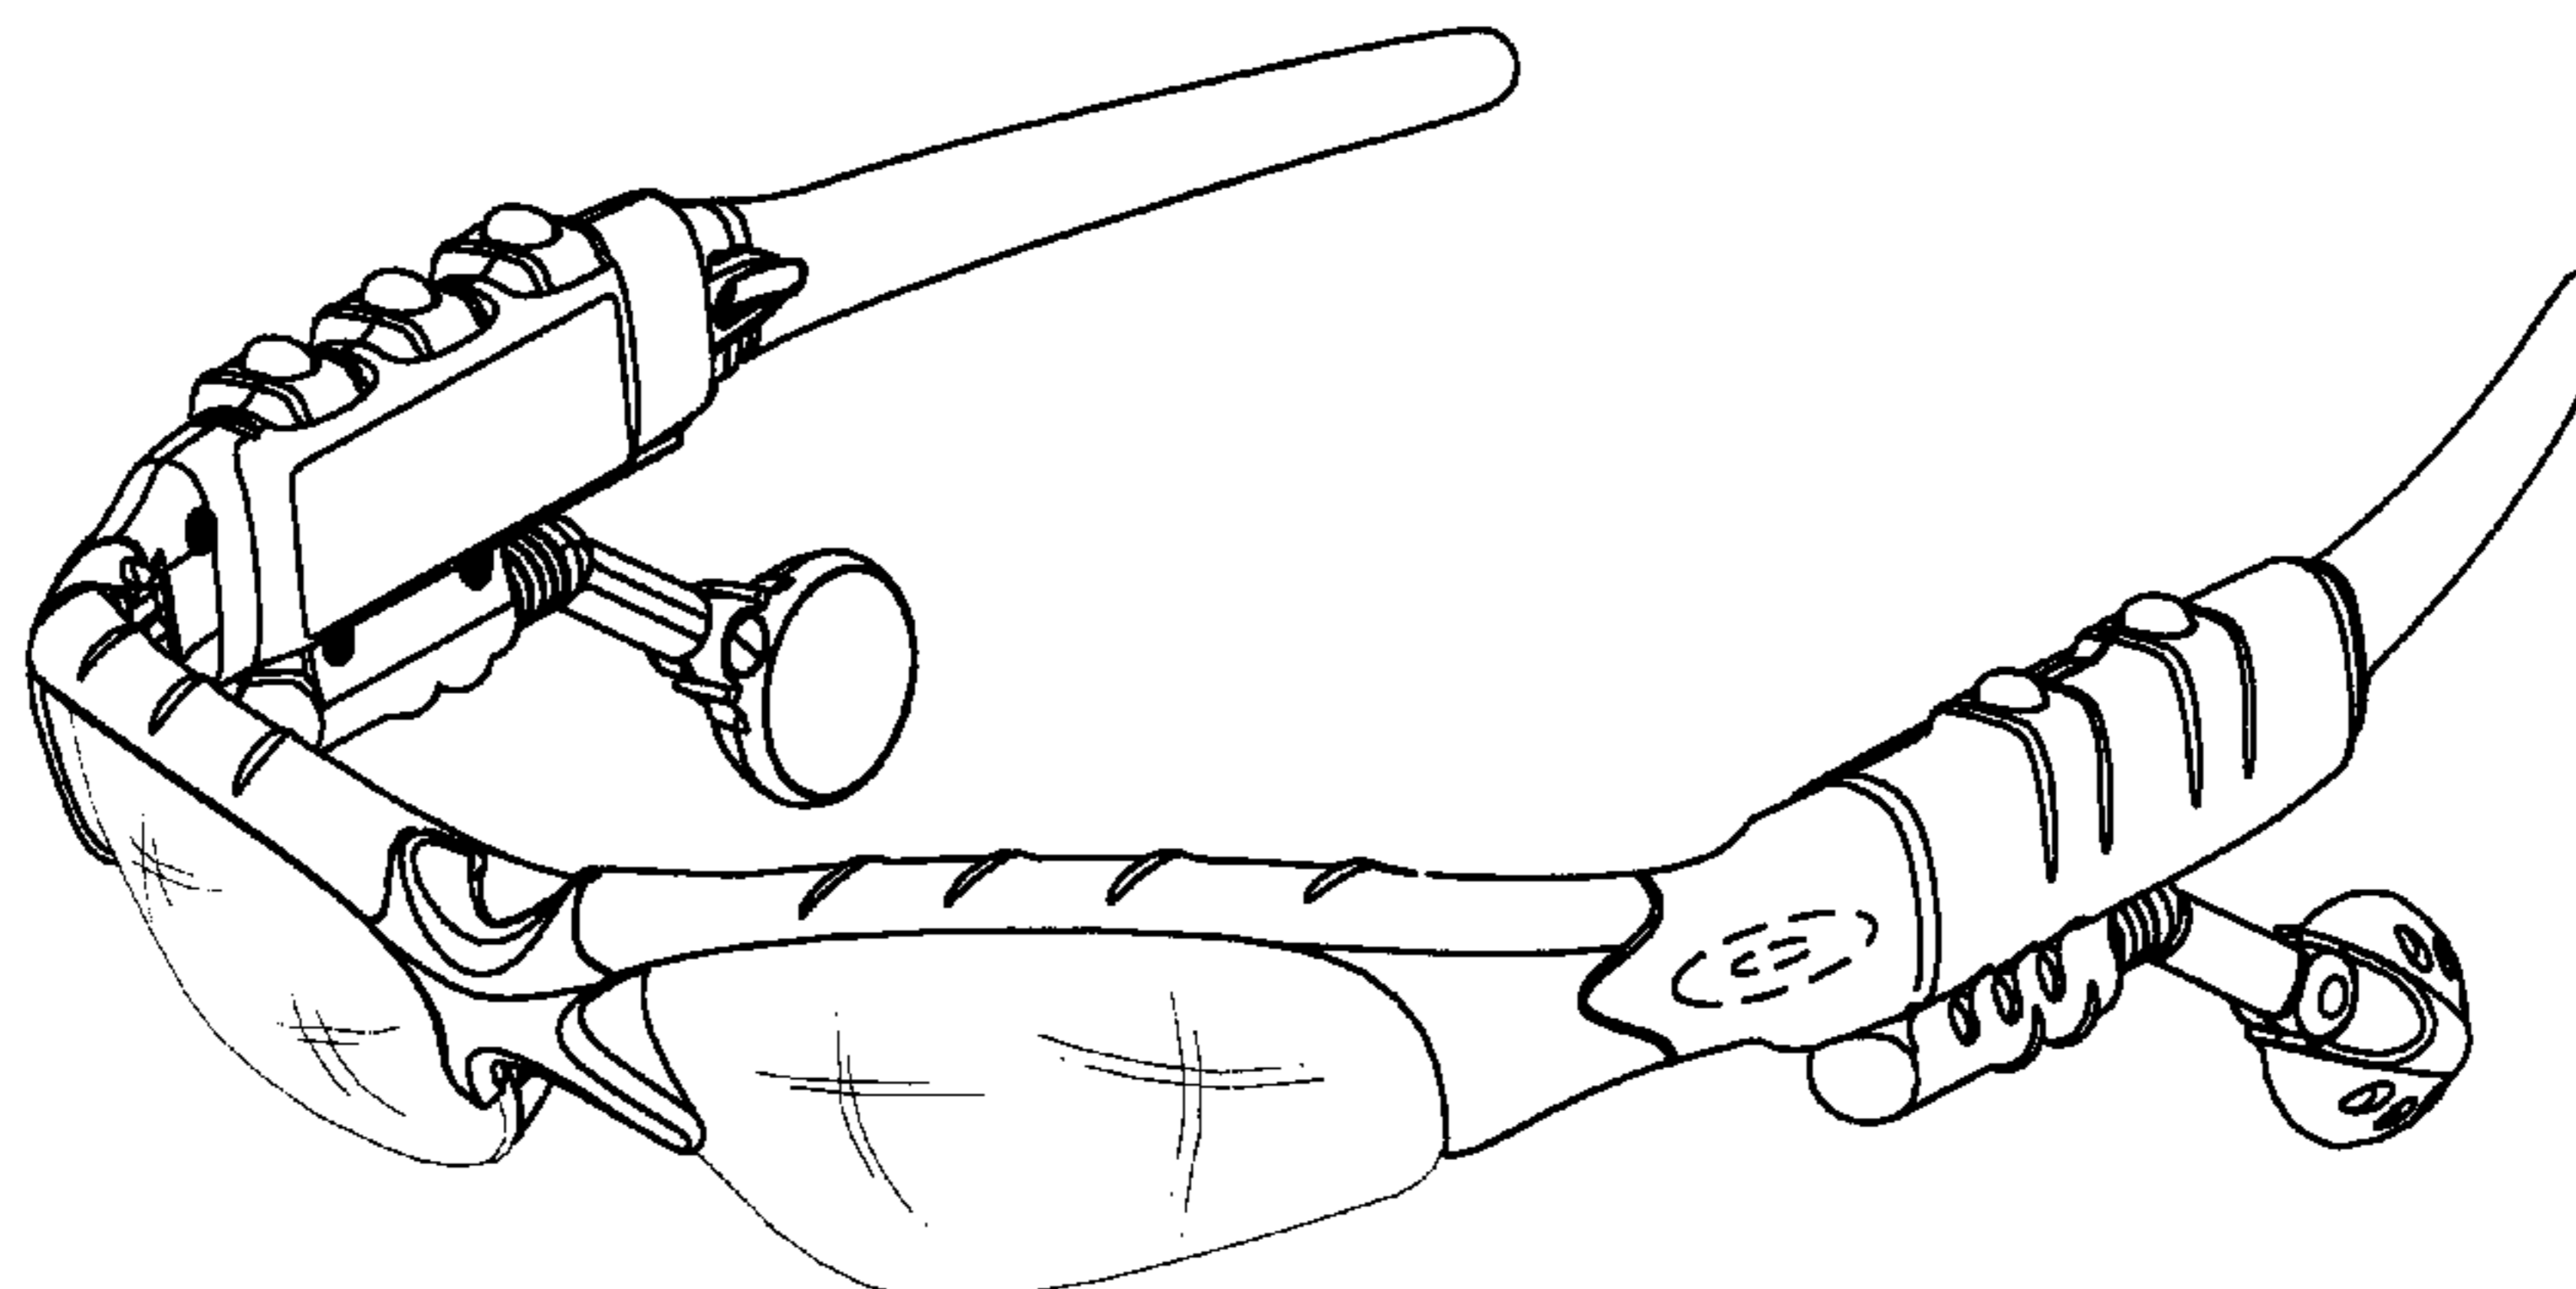

The ornamental design for an eyeglass and eyeglass components, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of the eyeglass and eyeglass components of the present invention;
 FIG. 2 is a front elevational view thereof;
 FIG. 3 is a rear elevational view thereof;
 FIG. 4 is a left-side elevational view thereof, the right-side elevational view being a mirror image thereof;
 FIG. 5 is a top plan view thereof;
 FIG. 6 is a bottom plan view thereof;
 FIG. 7 is a front perspective view of an alternative embodiment of the eyeglass and eyeglass components of the present invention;
 FIG. 8 is a front elevational view of the eyeglass and eyeglass components of FIG. 7;
 FIG. 9 is a rear elevational view of the eyeglass and eyeglass components of FIG. 7;
 FIG. 10 is a left-side elevational view of the eyeglass and eyeglass components of FIG. 7, the right-side elevational view being a mirror image thereof;
 FIG. 11 is a top plan view of the eyeglass and eyeglass components of FIG. 7;
 FIG. 12 is a bottom plan view of the eyeglass and eyeglass components of FIG. 7;
 FIG. 13 is a front perspective of an alternative embodiment of the eyeglass and eyeglass components of the present invention; and,
 FIG. 14 is a front elevational view of the eyeglass and eyeglass components of FIG. 13.

Phantom lining, where utilized, is for illustrative purposes only and is not intended to limit the claimed design to the features shown in phantom.
